## Career Objective

Future AI/ML Engineer developing full-stack expertise as a strategic foundation. Currently pursuing Computer Science while building practical experience with Python, data analysis, and modern web technologies. Seeking development roles that provide the technical groundwork for transitioning into machine learning and data science positions.

## Education

Bachelor of Science in Computer Science  
Multimedia University of Kenya

Expected Graduation: 2028

Relevant Coursework: Data structures & Algorithms, Software Engineering, Programming Fundamentals, Discrete Mathematics

Full Stack Development Program

Power Learn Project

Expected completion: November 2025

Technologies: MERN Stack, Python, Javascript, MySQL, Git & Github

Project-based curriculum with industry mentorship

Python for Data Science

Alison.com

Currently enrolled

Online certification course (In progress)

Kenya Certificate of Secondary Education

Maryhill Girls' High School – Thika.

Year Completed: April 2022

Mean Grade: A- (minus)

Excelled in Mathematics and Sciences

Kenya Certificate of Primary Education

Playway Education Centre

Year Completed: Nov. 2017

Marks: 408/500

Strong academic foundation with outstanding performance

---

## Skills

### Technical Skills

- **Languages:** C, C++, Python, JavaScript, SQL
- **Databases:** MySQL, MongoDB
- **Web Technologies:** HTML5, CSS, MERN Stack
- **Version Control:** Git, GitHub

### Soft Skills

- Time management
- Communication
- Quick learner
- Attention to detail
- Team work

---

## Work Experience

### 1. Rapporteur

Staff and Partners' Training Workshop on Organizational Gender Transformative Approach and Unpacking Barriers to Girls' Education in Marginalized Communities in Kenya by Grassroots Nest for Innovations and Change (GRiC)

Dates: **10 th to 13th June 2025**

- Took detailed notes and summarized key discussions from training sessions.
- Delivered clear and well-structured reports highlighting key

insights.

- Practiced professional communication and time management.
- Facilitated recap sessions to reinforce previous day's lessons and promote engagement.

---

## Projects

- CommunityWatch – Full-Stack Community Platform [Click Here](#)

A zone-based issue tracking system addressing SDG #11 (Sustainable cities) through technology. Built with MERN Stack, featuring interactive maps, anonymous reporting and admin dashboard for real-time community issue resolution.

- Agroaid – AI Powered Land Guardian [Click Here](#)

Developed an AI driven Platform that uses satellite data and predictive analysis to detect land degradation risks. Built a real time monitoring dashboard with colour coded risk maps using leaflet.js and React, implemented RESTful API's with Node.js/Express and a Python AI engine for risk assesment. This project was done as part of a Land ReGen Hackathon.

- Personal Portfolio Website (Live website on Gitub) [Click Here](#)

Designed and built a responsive personal portfolio using HTML, CSS and JavaScript. Includes projects, contact form, and downloadable CV.
