## Career Objective

Motivated Computer Science student currently pursuing a BSc in Computer Science at Multimedia University of Kenya. I am passionate about technology, programming, and digital innovation. Eager to apply and grow my skills through hands-on experience in tech related roles and projects, with a particular interest in AI/ML Engineering and Data Science. I'm committed to sharpening my skills in programming, problem solving and collaborative development. My goal is to become a well-rounded developer capable of addressing real world challenges.

---

---

## Projects

- Simple Calculator in C  
[Click Here](#)

A basic command-line calculator supporting +, -, \*, /, and % operations. Focused on error handling and input validation, built as my first C programming project.

- BMI health tracker (Python)  
[Click Here](#)

A CLI-based Python Application that takes user's input,

calculates BMI, saves records to a CSV file allows users to view their health history. This was built as my first Python project.

- Personal Portfolio Website (Live website on Github)  
[Click Here](#)

Designed and built a responsive personal portfolio using HTML and CSS. Includes projects, contact form, and downloadable CV.
